Full Stack Developer oriented to Front End Developing. Experience working with NodeJS, React, Redux, SQL and more technologies. Contributed from start to finish in web application for a 3D Printing business. Elaborated backend using MongoDB and NodeJS. Used Postman to simulate front end queries. Within 3 weeks, learned new technologies and implemented these in our 3DSeller web application. Used GIT and Trello to teamwork and harmonize our work. Used SCRUM Agile methodology for this project. Still continuing my education as a self-taught developer.

TECHNOLOGIES

HTML, CSS, Javascript, React, Redux, Node.js, Express, MongoDB, Mongoose, Trello, Figma, Scrum.

PROJECTS

Full Stack Web Developer – 3DSeller

jan. 02 - jan. 26

Henry Bootcamp, Buenos Aires, Argentina.

- Build several endpoints for CRUD management.
- Used GIT to avoid clashing and merge conflicts with other members.
- Did sprint presentation to Product Owner and defended project.
- Developed this group Project using what I learned at HENRY plus other technologies I had to research. <[3DSeller](#)>
